

MetalFlow®

Cleaners

Our technology, your solution

METALFLOW cleaners are the result of decades of experience in the fields of design, development, and manufacturing of technical agents designed to clean metallic surfaces.

The METALCLEAN range is comprised of cleaners formulated with aqueous solutions or organic solvents designed to provide the metalworking industry with all types of degreasing and disinfecting solutions for pieces and circuits. They act on ferrous and non-ferrous metals at different temperatures and under any application system.

Solutions with technological character that help our clients with their waste management and allow them to comply with the most demanding environmental standards.

Specific formulas for parts, tanks and circuits cleaning.

Highlights:

- High degreasing power, remove dust and residues of soluble products or pure oils.
- Anticorrosion protection after washing.
- Suitable for any type of metal and for different washing temperatures.
- Productivity increasement.
- Meet different environmental and safety standards.
- Optimal decontamination of microorganisms such as bacteria and fungi from machines and circuits.

Part and surface cleaners

	Description	Temperature °C	Application method			
			Spray	Dipping	Manual	Recirculation
METALCLEAN 2411	Aqueous alkaline degreasing agent for industrial cleaning of machined parts, suitable for ultrasounds. Ideal for aluminum alloys.	30-70	●	●		
METALCLEAN 2325	Aqueous alkaline degreasing agent for industrial cleaning of machined parts, suitable for ultrasounds. Ideal for ferrous alloys.	30-70	●	●		
METALCLEAN 4420	Solvent-based degreasing agent for industrial cleaning.	Room Temperature		●	●	
METALCLEAN 6130	Lemon-scented solvent-based daily surface degreaser.	Room Temperature		●	●	
METALCLEAN 6000	Cleaning and disinfecting agent for tanks and circuits.	Room Temperature				●

SPAIN - Barcelona
MEXICO - Querétaro
BRAZIL - São Paulo
INDIA - Pune
CHINA - Hefei

METALWORKING FLUIDS

- Coolants
- Cutting Oils
- Forming Lubricants

DIE CASTING LUBRICANTS

- Die Casting Release Agents
- Gravity and Low Pressure Release Agents
- Plunger Lubricants
- Industrial & Technical Auxiliary Lubricants

FORGING LUBRICANTS

- Graphite Based Release Agents
- Graphite Free Release Agents

INDUSTRIAL LUBRICANTS

- Hydraulic Fluids
- Gear Oils
- Slideway & Chain Oils
- Thermic Oils
- Boundry lubrication additives

SURFACE TREATMENTS

- Cleaners
- Surface Protectors

EQUIPMENT

- Dosing & Application Equipment
 - Monitoring Equipment
-
